B.Sc Mathematics

a) Give the students a sufficient knowledge of fundamental principles, methods and a clear perception of innumerous power of mathematical ideas and tools and know how to use them by modelling, solving and interpreting.
b) Reflecting the broad nature of the subject and developing mathematical tools for continuing further study in various fields of science.
c) Enhancing students' overall development and to equip them with mathematical modelling abilities, problem solving skills, creative talent and power of communication necessary for various kinds of employment.
d) Enabling students to develop a positive attitude towards mathematics as an interesting and valuable subject of study.
