Progressive Education Society's Modern College of Arts, Science and Commerce

(Autonomous),

Shivajinagar, Pune - 5

(An Autonomous College Affiliated to Savitribai Phule Pune University, Pune: 7)

Framework and

Syllabus of

M.Sc. (Computer Application)

(Based on NEP 2020 framework)
(To be implemented from the Academic Year 2023-24)

Semester 1 (First Year)

Semester 1 (F

Semester –I (First Year)

Progressive Education Society's Modern College of Arts, Science and Commerce (Autonomous) Shivajinagar, Pune - 5

First Year of M.Sc. (Computer Application) (2019 Course)

Course Code: 23CsCmaP111

Course Name: Design and Analysis of Algorithms

Teaching Scheme: TH:4 Hours/Week Credits:04

Examination Scheme: CIA: 50 Marks End-Sem: 50 Marks

Prerequisites:

- Basic knowledge of algorithms and programming concepts
- Data Structures and Advanced Data Structures
- Basic Knowledge of Graphs and Algorithms

Course Objectives:

- To select the appropriate algorithm by doing necessary analysis of algorithms
- To learn basic Algorithm Analysis techniques and understand the use of asymptotic notation as well as different design strategies

Course Outcomes:

On completion of the course, student will be able to-

- Analyze the problem and develop the algorithm
- Classify the problem and apply the appropriate design strategy to develop algorithm
- Design algorithm in context of space and time complexity and apply asymptotic notation

Course Contents:

Unit No.	Title	Number of
		Lectures

Unit 1	Basics of Algorithms	8
	1.1 Algorithm definition and characteristics	
	1.2 Space complexity	
	1.3Time complexity, worst case-best case-average	
	case complexity, asymptotic notation	
	1.4 Recursive and non-recursive algorithms	
	1.5 Sorting algorithms (insertion sort, heap sort,	
	Bubble sort)	
	1.6 Sorting in linear time: counting sort, concept of	
	bucket and radix sort	
	1.7 Searching algorithms: Linear, Binary	
Unit 2	Divide and Conquer strategy	4
	2.1 General method, control abstraction	
	2.2 Binary search	
	2.3 Merge sort, Quick sort	
	2.4 Comparison between Traditional method of	
	Matrix Multiplication vs.	
	Strassen's Matrix Multiplication	
Unit 3	Greedy Method	10
	3.1 Control Abstraction	
	3.2 Knapsack problem	
	3.3 Job sequencing with deadlines,	
	3.4 Minimum-cost spanning trees:	
	Kruskal and Prim's algorithm	
	3.5 Optimal storage on tapes	
	3.6 Optimal merge patterns	
	3.7 Huffman coding	
	3.8 Shortest Path: Dijkstra's algorithm	
Unit 4	Dynamic Programming	7
	4.1 Principle of optimality	
	4.2 Matrix chain multiplication	
	4.3 0/1 Knapsack Problem	
	4.3.1 Merge & Purge	
	4.3.2 Functional Method	

	4.4 Concept of Shortest Path	
	4.4.1 Single Source shortest path	
	4.4.2 Dijkstra's Algorithm	
	4.4.3 Bellman Ford Algorithm	
	4.4.4 All pairs Shortest Path	
	4.4.5 Floyd- Warshall Algorithm	
	4.4.6 Longest common subsequence	
	4.4.7 String editing	
	4.4.8 Travelling Salesperson Problem	
Unit 5	Decrease and Conquer	5
	5.1 Definition of Graph	-
	5.2 Representation of Graph	
	By - DFS and BFS	
	5.3 Topological sorting	
	5.4 Connected components and spanning trees	
	5.5 By Variable Size decrease Euclid's algorithm	
	5.6 Flow in graph	
	8 1	
	5.7 Articulation Point and Bridge edge	
Unit 6	5.7 Articulation Point and Bridge edge Backtracking	5
Unit 6	<u> </u>	5
Unit 6	Backtracking	5
Unit 6	Backtracking 6.1 General method	5
Unit 6	Backtracking 6.1 General method 6.2 Fixed Tuple vs. Variable Tuple Formulation	5
Unit 6	Backtracking 6.1 General method 6.2 Fixed Tuple vs. Variable Tuple Formulation 6.3 n- Queen's problem	5
Unit 6	Backtracking 6.1 General method 6.2 Fixed Tuple vs. Variable Tuple Formulation 6.3 n- Queen's problem 6.4 Graph coloring problem	5
Unit 6 Unit 7	Backtracking 6.1 General method 6.2 Fixed Tuple vs. Variable Tuple Formulation 6.3 n- Queen's problem 6.4 Graph coloring problem 6.5 Hamiltonian cycle	5
	Backtracking 6.1 General method 6.2 Fixed Tuple vs. Variable Tuple Formulation 6.3 n- Queen's problem 6.4 Graph coloring problem 6.5 Hamiltonian cycle 6.6 Sum of subsets	
	Backtracking 6.1 General method 6.2 Fixed Tuple vs. Variable Tuple Formulation 6.3 n- Queen's problem 6.4 Graph coloring problem 6.5 Hamiltonian cycle 6.6 Sum of subsets Branch and Bound	
	Backtracking 6.1 General method 6.2 Fixed Tuple vs. Variable Tuple Formulation 6.3 n- Queen's problem 6.4 Graph coloring problem 6.5 Hamiltonian cycle 6.6 Sum of subsets Branch and Bound 7.1 Introduction	
	Backtracking 6.1 General method 6.2 Fixed Tuple vs. Variable Tuple Formulation 6.3 n- Queen's problem 6.4 Graph coloring problem 6.5 Hamiltonian cycle 6.6 Sum of subsets Branch and Bound 7.1 Introduction 7.2 Definitions of LCBB Search	
	Backtracking 6.1 General method 6.2 Fixed Tuple vs. Variable Tuple Formulation 6.3 n- Queen's problem 6.4 Graph coloring problem 6.5 Hamiltonian cycle 6.6 Sum of subsets Branch and Bound 7.1 Introduction 7.2 Definitions of LCBB Search 7.3 Bounding Function, Ranking Function	
	Backtracking 6.1 General method 6.2 Fixed Tuple vs. Variable Tuple Formulation 6.3 n- Queen's problem 6.4 Graph coloring problem 6.5 Hamiltonian cycle 6.6 Sum of subsets Branch and Bound 7.1 Introduction 7.2 Definitions of LCBB Search 7.3 Bounding Function, Ranking Function 7.4 FIFO BB Search	
	Backtracking 6.1 General method 6.2 Fixed Tuple vs. Variable Tuple Formulation 6.3 n- Queen's problem 6.4 Graph coloring problem 6.5 Hamiltonian cycle 6.6 Sum of subsets Branch and Bound 7.1 Introduction 7.2 Definitions of LCBB Search 7.3 Bounding Function, Ranking Function 7.4 FIFO BB Search 7.5 Traveling Salesperson problem Using Variable	

Unit 8	Problem Classification	3
	8.1 Nondeterministic algorithm	
	8.2 The class of P, NP, NP-hard and NP-Complete	
	problems	
	8.3 Cook's theorem	
Unit 9	Experiential Learning	1
	9.1 Search n number of cities on Google map and find	
	shortest route	
	9.2 Consider any stable algorithms which are	
	currently in use and find out space Complexity,	
	Time Complexity and control abstraction

Modern College of Arts, Science and Commerce (Autonomous) Shivajinagar, Pune - 5

First Year of M.Sc. (Computer Application) (2019 Course)

Course Code: 23CsCmaP112

Course Name: .NET

Teaching Scheme: TH: 4 Hours/Week Credit: 04

Examination Scheme: CIA: 50 Marks End-Sem: 50 Marks

Prerequisites:

- Knowledge of object-oriented programming concepts such as data abstraction, encapsulation, inheritance, and polymorphism.
- Familiarity with programming language such as C++ and/or Java.
- Knowledge of web development

Objectives:

- To understand the DOTNET framework,
- C# language features
- Web development using ASP.NET

Course Outcome:

- Students able to learn C# fundamentals
- Students develop web-sites using .NET framework

Course Contents

Unit	Title			Number of Lectures
No.				
Unit 1	DOT	NET Fr	amework	2
	1.1	Introd	luction to DOTNET	
	1.2	DOT	NET class framework	
	1.3	Comr	non Language Runtime	
		1.3.1	Overview	
		1.3.2	Elements of .NET application	
		1.3.3	Memory Management	
		1.3.4	Garbage Collector: Faster Memory allocation,	
			Optimizations	
	1.4	Comn	non Language Integration	

	1.4.1 Common type system	
	1.4.2 Reflection API	
	1.5 User and Program Interface	
Unit 2	Introduction to C#	6
CIIIC 2	2.1 Language features	· · ·
	2.1.1 Variables and Expressions, type con-	version
	2.1.2 Flow Control	, Gibion
	2.1.3 Functions, Delegates	
	2.1.4 Debugging and error handling, except	otion handling
	(System Defined and User Defined)	
	2.2 Object Oriented Concepts	
	2.2.1 Defining classes, class members, Interest.	erfaces,
	properties	
	2.2.2 Access modifiers, Implementation of	f class, interface
	and properties	
	2.2.3 Concept of hiding base class method	s, Overriding
	2.2.4 Event Handling	
	2.3 Collections, Comparisons and Conversions	
	2.3.1 Defining and using collections,	
	2.3.2 Indexers, iterators	
	2.3.3 Type comparison, Value Comparison	
	2.3.4 Overloading Conversion operators, a	is operator
	Generics 2.4 Generics	
	2.4.1 Using generics 2.4.2 Defining Generics, generic Interface	s Generic
	methods, Generic Delegate	s, delienc
	methods, Generic Delegate	
Unit 3	Window Programming	5
	3.1 Window Controls	
	3.1.1 Common Controls	
	3.1.2 Container Controls	
	3.1.3 Menus and Toolbars	
	3.1.4 Printing	
	3.1.5 Dialogs	
	8	
	3.2.1 Deployment Overview	
	3.2.2 Visual studio setup and Deploy	ment project
	types	
	3.2.3 Microsoft windows installer are	
	3.2.4 Building the project : Installation	on
Unit 4	Data Access	2
	4.1 File System Data	
	4.2 XML	
	4.3 Databases and ADO.NET	
	4.4 Data Binding	
Unit 5	Web Programming	2
nit E		/

	#1D ' W1	
	5.1 Basic Web programming	
	5.2 Advanced Web programming	
	5.3 Web Services	
	5.4 Deployment Web applications	
Unit 6	.NET Assemblies	4
	6.1 Components	
	6.2 .NET Assembly features	
	6.3 Structure of Assemble	
	6.4 Calling assemblies, private and shared assemblies	
Unit 7	Networking	3
	7.1 Networking overview	
	7.2 Networking programming options	
	7.2.1 Webclient	
	7.2.2 WebRequest and WebResponse	
	7.2.3 TcpListener &TcpClient	
TI 1/ 0		2
Unit 8	Introduction to GDI+	3
	8.1 Overview of Graphical Drawing8.2 Pen Class, Brush Class, Font Class	
	8.3 Using Images	
	8.4 Clipping, Drawing2D, Imaging	
	or chipping, brawing25, maging	
Unit 9	Introduction to ASP.NET	2
Unit 9		2
Unit 9	9.1 About ASP.NET	2
Unit 9	9.1 About ASP.NET 9.2 Environment	2
	9.1 About ASP.NET 9.2 Environment 9.3 Life cycle	
Unit 9 Unit 10	9.1 About ASP.NET 9.2 Environment 9.3 Life cycle Server Controls and Variables, control Structures	2
	9.1 About ASP.NET 9.2 Environment 9.3 Life cycle Server Controls and Variables, control Structures & Functions	
	9.1 About ASP.NET 9.2 Environment 9.3 Life cycle Server Controls and Variables, control Structures & Functions 10.1 Forms, webpages, HTML forms, Webforms	
	9.1 About ASP.NET 9.2 Environment 9.3 Life cycle Server Controls and Variables, control Structures & Functions 10.1 Forms, webpages, HTML forms, Webforms 10.2 Request & Response in Non-ASP.NET pages	
	9.1 About ASP.NET 9.2 Environment 9.3 Life cycle Server Controls and Variables, control Structures & Functions 10.1 Forms, webpages, HTML forms, Webforms	
	9.1 About ASP.NET 9.2 Environment 9.3 Life cycle Server Controls and Variables, control Structures & Functions 10.1 Forms, webpages, HTML forms, Webforms 10.2 Request & Response in Non-ASP.NET pages 10.3 Using ASP.NET Server Controls 10.4 Datatypes: Numeric, text, arrays, Data collections	
	9.1 About ASP.NET 9.2 Environment 9.3 Life cycle Server Controls and Variables, control Structures & Functions 10.1 Forms, webpages, HTML forms, Webforms 10.2 Request & Response in Non-ASP.NET pages 10.3 Using ASP.NET Server Controls 10.4 Datatypes: Numeric, text, arrays,	
	9.1 About ASP.NET 9.2 Environment 9.3 Life cycle Server Controls and Variables, control Structures & Functions 10.1 Forms, webpages, HTML forms, Webforms 10.2 Request & Response in Non-ASP.NET pages 10.3 Using ASP.NET Server Controls 10.4 Datatypes: Numeric, text, arrays, Data collections	
Unit 10	9.1 About ASP.NET 9.2 Environment 9.3 Life cycle Server Controls and Variables, control Structures & Functions 10.1 Forms, webpages, HTML forms, Webforms 10.2 Request & Response in Non-ASP.NET pages 10.3 Using ASP.NET Server Controls 10.4 Datatypes: Numeric, text, arrays, Data collections 10.5 Overview of Control structures 10.6 Functions: web controls as parameters	2
	9.1 About ASP.NET 9.2 Environment 9.3 Life cycle Server Controls and Variables, control Structures & Functions 10.1 Forms, webpages, HTML forms, Webforms 10.2 Request & Response in Non-ASP.NET pages 10.3 Using ASP.NET Server Controls 10.4 Datatypes: Numeric, text, arrays, Data collections 10.5 Overview of Control structures 10.6 Functions: web controls as parameters Even Driven Programming and Post Back	
Unit 10	9.1 About ASP.NET 9.2 Environment 9.3 Life cycle Server Controls and Variables, control Structures & Functions 10.1 Forms, webpages, HTML forms, Webforms 10.2 Request & Response in Non-ASP.NET pages 10.3 Using ASP.NET Server Controls 10.4 Datatypes: Numeric, text, arrays, Data collections 10.5 Overview of Control structures 10.6 Functions: web controls as parameters Even Driven Programming and Post Back 11.1HTML events	2
Unit 10	9.1 About ASP.NET 9.2 Environment 9.3 Life cycle Server Controls and Variables, control Structures & Functions 10.1 Forms, webpages, HTML forms, Webforms 10.2 Request & Response in Non-ASP.NET pages 10.3 Using ASP.NET Server Controls 10.4 Datatypes: Numeric, text, arrays, Data collections 10.5 Overview of Control structures 10.6 Functions: web controls as parameters Even Driven Programming and Post Back 11.1HTML events 11.2 ASP.NET page events	2
Unit 10	9.1 About ASP.NET 9.2 Environment 9.3 Life cycle Server Controls and Variables, control Structures & Functions 10.1 Forms, webpages, HTML forms, Webforms 10.2 Request & Response in Non-ASP.NET pages 10.3 Using ASP.NET Server Controls 10.4 Datatypes: Numeric, text, arrays, Data collections 10.5 Overview of Control structures 10.6 Functions: web controls as parameters Even Driven Programming and Post Back 11.1HTML events 11.2 ASP.NET page events 11.3 ASP.NET Web control events	2
Unit 10 Unit 11	9.1 About ASP.NET 9.2 Environment 9.3 Life cycle Server Controls and Variables, control Structures & Functions 10.1 Forms, webpages, HTML forms, Webforms 10.2 Request & Response in Non-ASP.NET pages 10.3 Using ASP.NET Server Controls 10.4 Datatypes: Numeric, text, arrays, Data collections 10.5 Overview of Control structures 10.6 Functions: web controls as parameters Even Driven Programming and Post Back 11.1HTML events 11.2 ASP.NET page events 11.3 ASP.NET Web control events 11.4 Event driven programming and post back	2
Unit 10	9.1 About ASP.NET 9.2 Environment 9.3 Life cycle Server Controls and Variables, control Structures & Functions 10.1 Forms, webpages, HTML forms, Webforms 10.2 Request & Response in Non-ASP.NET pages 10.3 Using ASP.NET Server Controls 10.4 Datatypes: Numeric, text, arrays, Data collections 10.5 Overview of Control structures 10.6 Functions: web controls as parameters Even Driven Programming and Post Back 11.1HTML events 11.2 ASP.NET page events 11.3 ASP.NET Web control events 11.4 Event driven programming and post back Reading from Databases	2
Unit 10 Unit 11	9.1 About ASP.NET 9.2 Environment 9.3 Life cycle Server Controls and Variables, control Structures & Functions 10.1 Forms, webpages, HTML forms, Webforms 10.2 Request & Response in Non-ASP.NET pages 10.3 Using ASP.NET Server Controls 10.4 Datatypes: Numeric, text, arrays, Data collections 10.5 Overview of Control structures 10.6 Functions: web controls as parameters Even Driven Programming and Post Back 11.1HTML events 11.2 ASP.NET page events 11.3 ASP.NET Web control events 11.4 Event driven programming and post back	2

Unit 13	ASP.NET Server Controls	7
	13.1 ASP.NET Web Controls	
	13.2 HTML Server Controls	
	13.3 Web Controls	
Unit 14	DOTNET assemblies and Custom Controls	2
	14.1 Introduction to Cookies, Sessions	
	14.2 Session events	
	14.3 State management Recommendations	
Unit 15	Web Services	2
	15.1 HTTP, XML & Web services	
	15.2 SOAP	
	15.3 Building ASP.NET web service	
	15.4 Consuming a web service	
Unit 16	Experiential learning	1
	16.1 Review performance statistics of websites developed in .net

Modern College of Arts, Science and Commerce (Autonomous) Shivajinagar, Pune - 5

First Year of M.Sc. (Computer Application) (2019 Course)

Course Code: 23CsCmaP113

Course Name: Web Programming-I

Teaching Scheme: 4 Lectures/Week Credits: 4

Examination Scheme: CIA: 50 Marks End-Sem: 50 Marks

Desirable Prerequisites:

• Basic knowledge in HTML

• Tags & skill of creating web pages should be known

Course Objectives:

- Visualize the basic concept of HTML,XML
- Introduce concept of CSS

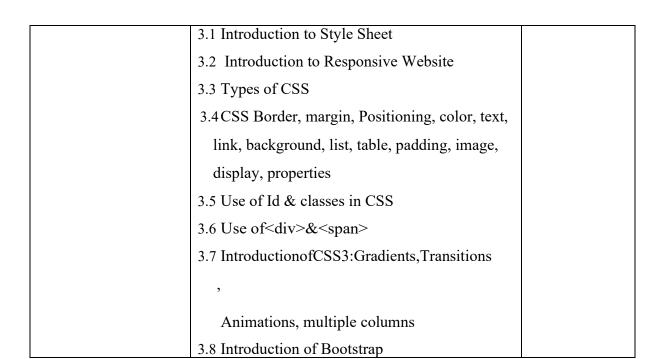

Course Outcomes:

On completion of the course, student will be able to-

- Implement interactive webpage(s) using HTML,CSS,XML
- Design a responsive website using HTML5 and above, CSS3 and above and XML

Course Contents:

Unit	Title	Number of
No.		Lectures
Unit 1	Introduction to Web Technologies	6
	1.1 Introduction to Web Technologies	
	1.2 How the Website Works?	
	1.3 Software to create your website	
	1.4 What makes a good website?	
	1.5 Client-Server and its Communication	
	1.6 Client and Server Scripting Languages	
	1.7 Internet-Basic, Internet	
	1.8 Protocols(HTTP,FTP,IP)	
	1.9 World Wide Web(WWW).	
	1.10 HTTP request message, HTTP	
	response message	
	1.11 Types of Websites (Static and Dynamic	
	Websites)	
Unit 2	Introduction to HTML	10
	2.1 Introduction to HTML	
	2.2 HTML tags and attributes	
	2.3 Working with Elements	
	2.4 Inserting Image	
	2.5 Client Server image mapping	
	2.6 List	
	2.7 Tables	
	2.8 Text and Image links	
	2.9 Frames	
	2.10 Forms and controls	
	2.11 Introduction with textbox, textarea,	
	buttons, Listbox, radio, checkbox etc	
Unit 3	CSS	6

Unit 4	JAVASCRIPT	9
	4. 1 Concept of script, Types of	
	Scripts, Introduction to JavaScript	
	4.2 Variables, identifier & operator,	
	control structure	
	4.3 Examples on JavaScript operators	
	4.4 Functions	
	4.5 Event Handling in JavaScript	
	4.6 Concept of array, how to use it in JavaScript, Types of an array, examples	
	4.7 Event handling in JavaScript with examples	
	4.8 Math and date object and examples	
	4.9 String object and examples on it, and	
	some predefined functions	
	4.10 DOM concept in Java Script, DOM objects	
	4.11ValidationsinJavaScript with examples	
Unit 5	jQuery	5
	5.1 jQuery basics	
	5.2 jQuery selectors	
	5.3 jQuery effects	
	5.4 jQuery - DOM Manipulation	
	5.5 jQuery - CSS Manipulation	
	5.6 jQuery Events	
Unit 6	XML	10
Onit 0	6.1 Introduction to XML	10
	6.2 Uses of XML	
	6.3 Simple XML,	
	6.4 XML key components	
	6.5 DTD and Schemas,	
	6.6 Using XML with web applications.	
	6.7 Introduction to XSL,	
	XSLelements, transforming	
	with XSLT	
Unit 7	EXPERIENTIAL LEARNING	1

Modern College of Arts, Science and Commerce (Autonomous) Shivajinagar, Pune - 5

First Year of M.Sc. (Computer Application) (2019 Course)

Course Code: 23CsCmaP114

Course Name: Lab on .NET and Web Programming-I

Teaching Scheme: Practical: 2+2 = 4 Hours/Week Credit: 02

Examination Scheme: CIA: 25 Marks End-Sem: 25 Marks

Assignments on Web Programming-I

Sub: Web Programming:I (HTML, CSS, JavaScript, XML)		
Sr.	Title of the Assignment	
No.		
1.	HTML tags	
2.	Frames, Elements of Forms	
3.	CSS Border, margin, Positioning, color, text, link, background, list, table, padding, image, display properties	
4.	CSS3 Gradients, Transitions, Animations, multiple columns	
5.	Simple function in JavaScript	
6.	Array in JavaScript	
7.	Validations in JavaScript	
8.	Simple XML	
9.	Using DTD and Schemas in XML	
10.	Using XML with web applications.	

Sub: Assignments on .NET	
Sr. No	Title of the Assignment
1.	Array(one dimension, Two dimension, Jagged Array)
2.	Function
3.	OOP's concepts
4.	Properties
5.	Indexers
6.	Parameter Modifiers
7.	Exception Handling
8.	Collection classes
9.	Generic
10.	Window Application(ADO.NET)
11.	Web Application(ADO.NET)
12.	Web Services

Modern College of Arts, Science and Commerce (Autonomous) Shivajinagar, Pune - 5

First Year of M.Sc. (Computer Application) (2019 Course)

Course Code: 23CsCmaP121

Course Name: Software Development Engineering in Testing

Teaching Scheme: TH:4Hours/Week Credits: 04

Examination Scheme: CIA: 50 Marks End-Sem: 50 Marks

Pre-requites: Knowledge of Software Engineering

Objectives:

• Understanding software development life cycle

Understanding Security testing

Course outcome:

On completion of the course, students will be able to

- Learn the different types of testing tools
- Apply the tools to write test cases and use different testing tools

Course Contents:

Unit	Title	Number of
		Lectures
Unit 1	SDLC	4
	1.1 What is Software development life cycle(SDLC)?	
	1.2 Phases of SDLC	
	1.3 Models of SDLC-Waterfall, Agile and Agile	

Scrum	
1.4 What is the difference between Waterfall and Agile?	
1.5 Advantages of using Agile Over Waterfall	
1.6 Agile Scrum and Lean Model	
1.7 User story, Story Points, Product backlog, Sprint	
backlog, Roles and responsibility of a scrum master	
and Product owner	
1.8 Meetings conducted in Agile Scrum	
Unit 2 Types of Testing	10
2.1 Static Testing/ Dynamic Testing	
2.2 Regression/ Retesting	
2.3 Usability/ accessibility	
2.4 Smoke / Sanity testing	
2.5 Unit Testing/ Integration Testing/ System	
Testing	
2.6 UAT – Alpha Testing /Beta Testing	
2.7 White Box/Black box testing	
2.8 Functional/Non-functional Testing	
2.9 Performance Testing	
2.10 Load Testing	
2.11 Stress Testing	
2.12 Penetration Testing	
2.13 Cross platform / Cross device testing	
Unit 3 STLC (Software Testing Life Cycle)	5
3.1 Test Planning	
3.2 Test Plan	
3.3 What is a test Plan	
3.4 Who creates a Test Plan	
3.5 When is the Test Plan created	
3.6 Purpose of creating a Test Plan	
3.7 Components of a Test plan.	
3.8 Test design	
3.9 Test implementation and Execution	

	3.10 Defect Reporting and tracking	
	3.11 Defect life cycle	
	3.12 Test closures	
	3.13 Test metrics	
Unit 4	Automation Testing – Basics	6
	4.1 Introduction to Automation Testing	
	4.2 What is Automation testing	
	4.3 Benefits of Automation Testing	
	4.4 Tool selection criteria	
Unit 5	Security Testing	6
	5.1 The Basis of Security Testing	
	5.2 Security Risks	
	5.3 Information Security Policies and Procedures	
	5.4 Security Auditing and Its Role in Security Testing	
Unit 6	Automation Testing with Testing Tools - Advanced	10
	6.1 Fundamentals of Selenium, overview, presentation,	
	export features, installation, Selenium IDE and web	
	driver	
	6.2 Test application with Selenium IDE, RC VS web	
	river, how to create test drive with web drive	
	6.3 Install Selenium IDE and Firebug	
	6.4 Selenium IDE Script, Locators in Selenium IDE	
	6.5 Source Control, Debugging Techniques, HTML, CSS	
	6.6 Installation of Selenium Web Driver, Scripts in Web	
	Driver	
	6.7 Accessing Forms in Web Driver, Links & Tables	
Unit 7	Web Services Testing	6
	7.1 Service Oriented Architecture (SOA), who uses SOA	
	7.2 Web Services, Why Web Services are Being Used?	
	What is WSDL?, Web Service Standards, tools to test	
	7.3 Web services, how to test web services, why to test	
	web services	
	7.4 Understanding WSDL, how is it used, specifications,	

	document, and file, Retrieving and Viewing/	
	Inspecting WSDL file	
	7.5 SOAP, SoapUI tool, download and installation	
	RESTFul Service	
1		
Unit 8	Experiential learning	1
Unit 8	Experiential learning 8.1 Compare performance characteristics of different	1

Modern College of Arts, Science and Commerce (Autonomous) Shivajinagar, Pune - 5

First Year of M.Sc. (Computer Application) (2019 Course)

Course Code: 23CsCmaP122

Course Name: Advanced Database Concepts

Teaching Scheme: 4 Lectures/Week Credits: 4

Examination Scheme: CIA:50 Marks End-Sem: 50 Marks

Prerequisites

Knowledge of RDBMS

Knowledge of SQL and PLSQL

Networking basics

Course Objectives

- To reinforce and strengthen the database concepts
- To equip students with knowledge to implement and integrate databases in actual applications.
- To introduce advanced concepts of transaction management and recovery techniques.
- To create awareness of how enterprise can organize and analyze large amounts of data

Course Outcomes:

On completion of the course, student will be able to

- Design and implement full-fledged real life applications integrated with database systems.
- Apply security controls to avoid any type of security incidents on vital database systems.
- Design advanced data systems using Object based systems or Distributing databases for better resource management.

Course Contents

Unit No.	Title	Number of
		Lectures
Unit 1	Introduction to Advanced Databases	3
	1.1 Database System Architectures:	
	1.2 Centralized and Client-Server Architectures	
	1.3 Server System Architecture	
	1.4 Parallel Systems	
	1.5 Distributed Systems	
Unit 2	Parallel Databases	5
	2.1 Introduction	
	2.2 Goals of Parallel Databases	
	2.3 Different Types of DBMS Parallelism	
	2.4 Performance Parameters	
	2.5 Parallel Data Architecture	
	2.6 Evaluation of Parallel Query	
	2.6.1 Inter and Intra Query Parallelism	
	2.6.2 Inter and Intra operation Parallelism	
	2.7 Optimization of Parallel query	
	2.8 Virtualization	
Unit 3	Distributed Databases	8
	3.1 Introduction	
	3.2 Goals of Distributed Databases	
	3.3 Types of Distributed Databases	
	(Horizontal, Vertical, Hybrid)	
	3.4 Data replication	
	3.5 Replication Schemas	
	3.6 Query Processing and Optimization	
	3.7 Recovery	
	3.7.1 Two-phase commit protocol	
	3.7.2 Concurrency problems	
	3.7.3 Concurrency Controls	
Unit 4	Object Based Databases	8

	4.1 Concepts of Object Databases	
	4.2 Features of OODBMS	
	4.3 Challenges in ODBMS Implementation	
	4.4 Object Identity – Object structure	
	4.5 Objects and Attributes	
	4.5.1 Type Constructors	
	4.5.2 Encapsulation of Operations	
	4.5.3 Methods	
	4.5.4 Persistence	
	4.5.5 Type and Class Hierarchy	
	4.6 Structures and Unstructured data	
	4.7 Case Studies	
Unit 5	XML Databases	9
	5.1 XML Data Model	
	5.2 DTD	
	5.3 XML Schema	
	5.4 XML Querying	
	5.4 Web Databases	
	5.6 JDBC	
	5.7 Information Retrieval	
Unit 6	Big Databases	3
	6.1 Introduction	
	6.2 Four V's of Big data	
	6.3 NoSQL Databases	
	6.4 Examples of NoSQL DB	
	6.5 Advantages	
	6.6 NoSQL Vs SQL	
Unit 7	NoSQL (Any one from MongoDB / CASSANDRA)	12
	7.1 Overview	
	7.2 Architecture	
	7.3 Features	
	7.4 Advantages	
	7.5 Basics	
	7.6 Servers	

	7.7 Databases	
	7.8 Collections	
	7.9 Documents / Objects	
	7.10 CRUD	
	7.11 Indexes	
Unit 8	Experiential Learning	1
Unit 8	Experiential Learning 8.1 Create same database using RDBMS and	1
Unit 8	•	1
Unit 8	8.1 Create same database using RDBMS and	1

Modern College of Arts, Science and Commerce (Autonomous)

Shivajinagar, Pune - 5

First Year of M.Sc. (Computer Application) (2019 Course)

Course Code: 23CsCmaP122 Course Name: Research Methodology

Section 1

Teaching Scheme: 2 Hours/Week Credit: 02

Examination Scheme: CIA:25 Marks End-Sem: 25 Marks

Prerequisite Courses:

• B.A., B.Sc. B.Com, B.Voc., BBA, BBA IB, BBA CA

Course Objectives:

- To make students aware about research and its importance
- To obtain knowledge regarding systematic gathering of data and get advanced knowledge in the selected topic
- To inculcate logical and organized thinking in students
- To investigate some existing situation or problem by creating new system or method
- To help students to design research problem

Course Outcomes:

On completion of the course, student will be able to-

- 1. Describe importance of research
- 2. Differentiate between unethical and ethical practices of publication ethics
- 3. Select research problem appropriately
- 4. Prepare good hypothesis
- 5. Design research problem systematically
- 6. Analyze and organize data correctly
- 7. Prepare good scientific research report

Course Contents

Unit No.	Title	Number of Lectures
Unit 1	Research problem and design	15
	1.1 Introduction to research : meaning and definition of	
	research, objective of research, importance of research,	
	characteristics of good research, purpose and role of	

	research, classification of research	
	1.2 Research problem: defining of research problem,	
	Criteria for selecting the research problem, , importance of	
	literature survey in defining research problem.	
	Hypothesis :Defining Hypothesis, types of hypothesis,	
	characteristics of good hypothesis, formulation of	
	hypothesis	
	1.3 Research Design: Definition and features of research	
	design, Concept of research design, types of research	
	design, preparation of research design, Sampling	
	techniques, characteristics of good sampling designs	
Unit 2	Data analysis, report writing and publication ethics	15
	2.1 Data Analysis: Definition of Data, methods of data	
	collection, analysis of data, types of data analysis,	
	Questionnaire, Design of Questionnaire, Testing	
	hypothesis: parametric and non-parametric tests: T-test, Z-	
	test, Chi-square test, ANOVA	
	2.2 Report writing : importance of interpretation of	
	results, meaning, definition and significance of report	
	/thesis writing, Principals of research report drafting, Types	
	of reports, layout of research report, important parts of	
	reports, precautions of preparation of report/ thesis	
	2.3 Publication ethics : definition, introduction and	
	importance, best practices/ standard settings initiative and	
	guidelines COPE, WAME, etc, conflict of interest,	
	Publication misconduct :definition, concept problems that	
	lead to unethical behavior, violation of publication ethics,	
	predatory publishers and journals, software tools to identify	
	predatory publications developed by SPPU

Modern College of Arts, Science and Commerce (Autonomous) Shivajinagar, Pune - 5

First Year of M.Sc. (Computer Application) (2019 Course)

Course Code: 23CsCmaP122 Course Name: Artificial Intelligence (Departmental Specific Elective)

Section 2

Teaching Scheme: TH: 4 Hours/Week Credit: 02

Examination Scheme: CIA: 25 Marks End-Sem: 25 Marks

Prerequisites: -

• Basic Knowledge of Data Structure.

• Basic knowledge of Algorithm.

Course Objectives:

- The course will cover basic ideas and techniques underlying the design of intelligent computer systems.
- To understand implementation of basic AI algorithms.

Course Outcomes:

On completion of the course, student will be able to-

- · Identify problems that are amenable to solution by AI methods.
- · Identify appropriate AI methods to solve a given problem.
- · Formalize a given problem in the language/framework of different AI methods.

Course Contents

Unit No.	Title	Number of Lectures
Unit 1	Introduction to AI	2
	1.1 Introduction to AI	
	1.2 History of AI	
	1.3 Course logistics	
Unit 2	Problem Solving	6
	2.1 Problem space	
	2.2 Solving Problems by Searching	
	2.3 Heuristic search techniques	
	2.4 Constraint satisfaction problems	

	2.5 Stochastic search methods	
Unit 3	Heuristic Search Techniques	10
	3.1 Generate-and-test	
	3.2 Hill Climbing	
	3.3 Best First Search	
	3.4 Problem Reduction	
	3.5 Constraint Satisfaction	
	3.6 Mean-Ends Analysis	
Unit 4	Knowledge and Reasoning:	12
	4.1 Building a Knowledge Base : Propositional	
	logic, first order logic, situation calculus.	
	4.2 Theorem Proving in First Order Logic.	
	Planning, partial order planning.	
	4.3 Uncertain Knowledge and Reasoning	
Unit 5	Knowledge Inference	11
	5.1 Knowledge representation -Production based	
	system, Frame based system.	
	5.2 Inference – Backward chaining, Forward	
	chaining, Rule value approach only	
	introduction with examples	
Unit 6	Gaming Planning and Learning	4
	6.1 Minimax, alpha-beta pruning	
	6.2 Overview of different forms of learning	
Unit 7	Experiential Learning	3
	Review any Two AI based Research Project	
	Find out problem definition of NLP/ Computer	
	Vision research projects

Semester –II (First Year)

Modern College of Arts, Science and Commerce (Autonomous) Shivajinagar, Pune - 5

First Year of M.Sc. (Computer Application) (2019 Course)

Course Code: 23CsCmaP211

Course Name: Advanced Operating Systems

Teaching Scheme: 4 Lectures/Week Credits: 4

Examination Scheme: CIA: 50 Marks End-Sem: 50 Marks

Prerequisites:

• Knowledge of Basic Operating System Concepts

• Knowledge of Computer Architecture

Course Objectives:

- To understand design issues related to process management
- To understand design issues related to memory management
- To understand design issues related to File management
- To study, learn and understand the main concepts of advanced operating systems
- To study Thread management
- Study of Synchronization, communication and scheduling in Parallel systems

Course Outcomes:

On completion of the course, student will be able to-

- Understand the concept of process and memory management
- Get the knowledge of process synchronization
- Identify and evaluate the storage management policies with respect to different storage management technologies
- Writing Shell scripts

Course Contents:

Title	Number of
	Lectures
Introduction	6
1.1 Definition	
1.2 Types of Operating systems	
1.3 System Boot	
1.4 Services provided by OS	
1.5 Introduction to UNIX OS	
1.6 Architecture of UNIX	
1.7 Basics of navigating UNIX environment	
1.8 Introduction to UNIX file system	
1.9 File system layout	
1.10 Files and directory management	
1.11 Processes and process management	
Process Management	4
2.1 Process Concept – The process, Process	
states, Process control block	
2.2 Process Scheduling – Scheduling queues,	
Schedulers, context switch System Calls:	
definition, implementation	
2.3 Operations on Process – Process creation	
with program using fork(), Process	
termination	
CPU scheduling	6
3.1 Basic Concept – CPU-I/O burst cycle,	
CPU scheduler, Pre-emptive scheduling,	
Dispatcher	
3.2 Scheduling Criteria	
3.3 Scheduling Algorithms – FCFS, SJF,	
Priority scheduling, Round-robin scheduling,	
Multiple queue scheduling, Multilevel	
	Introduction 1.1 Definition 1.2 Types of Operating systems 1.3 System Boot 1.4 Services provided by OS 1.5 Introduction to UNIX OS 1.6 Architecture of UNIX 1.7 Basics of navigating UNIX environment 1.8 Introduction to UNIX file system 1.9 File system layout 1.10 Files and directory management 1.11 Processes and process management Process Management 2.1 Process Concept – The process, Process states, Process control block 2.2 Process Scheduling – Scheduling queues, Schedulers, context switch System Calls: definition, implementation 2.3 Operations on Process – Process creation with program using fork(), Process termination CPU scheduling 3.1 Basic Concept – CPU-I/O burst cycle, CPU scheduler, Pre-emptive scheduling, Dispatcher 3.2 Scheduling Criteria 3.3 Scheduling Algorithms – FCFS, SJF, Priority scheduling, Round-robin scheduling,

	feedback queue scheduling	
Unit 4	Memory Management	8
	4.1 Background – Basic hardware, Address	
	binding, Logical versus physical address space,	
	Dynamic loading, Dynamic linking and shared	
	libraries	
	4.2 Swapping	
	4.3 Contiguous Memory Allocation –	
	Memory mapping and protection, Memory	
	allocation, Fragmentation	
	4.4 Paging – Basic Method, Hardware support,	
	Protection, Shared Pages	
	4.5 Segmentation – Basic concept,	
	4.6 Virtual Memory Management –	
	Background, Demand paging, Performance of	
	demand paging, Page replacement – FIFO, OPT,	
	LRU, Second chance page replacement	
Unit 5	Deadlock	6
Unit 5	Deadlock 5.1 System model	6
Unit 5		6
Unit 5	5.1 System model	6
Unit 5	5.1 System model 5.2 Deadlock Characterization – Necessary	6
Unit 5	5.1 System model 5.2 Deadlock Characterization – Necessary conditions, Resource allocation graph	6
Unit 5	5.1 System model 5.2 Deadlock Characterization – Necessary conditions, Resource allocation graph 5.3 Deadlock Prevention	6
Unit 5	 5.1 System model 5.2 Deadlock Characterization – Necessary conditions, Resource allocation graph 5.3 Deadlock Prevention 5.4 Deadlock Avoidance - Safe state, 	6
Unit 5	 5.1 System model 5.2 Deadlock Characterization – Necessary conditions, Resource allocation graph 5.3 Deadlock Prevention 5.4 Deadlock Avoidance - Safe state, Resource allocation graph algorithm, 	6
Unit 5	 5.1 System model 5.2 Deadlock Characterization – Necessary conditions, Resource allocation graph 5.3 Deadlock Prevention 5.4 Deadlock Avoidance - Safe state, Resource allocation graph algorithm, Banker's Algorithm 	6
Unit 5	 5.1 System model 5.2 Deadlock Characterization – Necessary conditions, Resource allocation graph 5.3 Deadlock Prevention 5.4 Deadlock Avoidance - Safe state, Resource allocation graph algorithm, Banker's Algorithm 5.5 Deadlock Detection 	6
Unit 5	 5.1 System model 5.2 Deadlock Characterization – Necessary conditions, Resource allocation graph 5.3 Deadlock Prevention 5.4 Deadlock Avoidance - Safe state, Resource allocation graph algorithm, Banker's Algorithm 5.5 Deadlock Detection 5.6 Recovery from Deadlock – Process 	4
	 5.1 System model 5.2 Deadlock Characterization – Necessary conditions, Resource allocation graph 5.3 Deadlock Prevention 5.4 Deadlock Avoidance - Safe state, Resource allocation graph algorithm, Banker's Algorithm 5.5 Deadlock Detection 5.6 Recovery from Deadlock – Process termination, Resource pre-emption 	
	 5.1 System model 5.2 Deadlock Characterization – Necessary conditions, Resource allocation graph 5.3 Deadlock Prevention 5.4 Deadlock Avoidance - Safe state, Resource allocation graph algorithm, Banker's Algorithm 5.5 Deadlock Detection 5.6 Recovery from Deadlock – Process termination, Resource pre-emption File System 	
	 5.1 System model 5.2 Deadlock Characterization – Necessary conditions, Resource allocation graph 5.3 Deadlock Prevention 5.4 Deadlock Avoidance - Safe state, Resource allocation graph algorithm, Banker's Algorithm 5.5 Deadlock Detection 5.6 Recovery from Deadlock – Process termination, Resource pre-emption File System 6.1 File concept 	
	 5.1 System model 5.2 Deadlock Characterization – Necessary conditions, Resource allocation graph 5.3 Deadlock Prevention 5.4 Deadlock Avoidance - Safe state, Resource allocation graph algorithm, Banker's Algorithm 5.5 Deadlock Detection 5.6 Recovery from Deadlock – Process termination, Resource pre-emption File System 6.1 File concept 6.2 Access Methods – Sequential, Direct, 	

	directory, Two level directory, Tree structure	
	directory, Acyclic graph directory, General	
	graph directory	
	6.4 Allocation Methods – Contiguous allocation,	
	Linked allocation, Indexed allocation	
	6.5 Free Space Management – Bit vector, Linked	
	list, Grouping, Counting, Space maps	
Unit 7	Introduction to Shell	10
	7.1 Types of shell	
	7.2 Working of Shell	
	7.3 Shell Commands	
	7.4 Permissions, users and groups	
	7.5 Using variables	
	7.6 Basic operators	
	7.7 Conditional statements	
	7.8 Loops	
	7.9 Command line arguments& IO	
	redirection	
	7.10 Functions and file manipulations	
	7.11 Regular expressions and filters	
Unit 8	Inter process Communication	3
	8.1 Inter process Communication – Shared	
	memory system, Message passing	
	systems	
	8.2 Critical Section Problem	
	8.3 Semaphores: Usage,	
	8.4 Classic Problems of Synchronization –	
	The bounded buffer problem, The reader	
	writer problem, The dining philosopher	
	problem

First Year of M.Sc. (Computer Application) (2019 Course)

Course Code: 23CsCmaP212

Course Name: Information System Security

Teaching Scheme: 4 Lectures/Week Credits: 4

Examination Scheme: CIA: 50 Marks End-Sem: 50 Marks

Desired Prerequisites:

• Knowledge of basic Information Systems

Course Objectives:

• To enable students to get sound understanding of Information system security and cryptography

Course Outcomes:

On completion of the course, student will be able to-

• Develop knowledge and skills for career in Information Security

Course Contents:

Unit No.	Title	Number of
		Lectures
Unit 1	Conceptual Foundation of Information	3
	Systems Security	

Unit 5	RSA Message Integrity Techniques	2
	DCA	
	4.8 DSS (Digital Signature Standard) and	
	Signature Algorithm)	
	4.7 Digital Signatures using DSA (Digital	
	4.6 Elliptic curve cryptography	
	4.5 Deffie-Hellman Key Exchange	
	4.4 Key Management	
	4.3 RSA Algorithm	
	4.2 Mathematical Foundation	
	4.1Principles of public key crypto-systems	
Unit 4	Public Key Encryption	8
	3.8 RC5	
	3.7 Blowfish	
	3.6 IDEA	
	3.5 AES (Advanced Encryption Standard)	
	3.4 Triple DES	
	3.3 Double DES	
	3.2 DES (Data Encryption Standard)	
	3.1 Algorithm Types and Modes	
Unit 3	Symmetric/Secret Key Encryption	6
	2.5 Cryptanalysis	
	2.4 Block Ciphers	
	2.3 Steam Ciphers	
	2.2 Mathematical Foundation	
	2.1 Techniques	
Unit 2	Cryptography	2
	Authorization, Accountability, Privacy	
	availability, Identification, Authentication,	
	1.2 Security – Confidentiality, Integrity,	
	Mitigation	
	Vulnerabilities, Risks, Risk Assessment and	
	1.1 Concepts and Terminology: Threats, Attacks,	

	5.1 MD5	
	5.2 SHA	
Unit 6	Public Key Infrastructure	4
	6.1 Trust Hierarchy	
	6.2 Digital Certificates	
	6.3 Transaction Certificates	
Unit 7	Authentication Techniques	4
	7.1 Passwords	
	7.2 Pass-code	
	7.3 Pass-phrase	
	7.4 Challenge-response	
	7.5 Biometrics based registration and	
	Authentication	
	7.6 Kerbores	
Unit 8	Internet Security Protocols	11
	8.1 SSL/TLS	
	8.2 TSP	
	8.3 SET	
	8.4 3-D Secure Protocol	
	8.5 Electronic Money	
	8.6 Email Security(PGP, PEM, S/MIME)	
	8.7 IP Security: IPSec, VPN	
Unit 9	Server Security	4
	9.1 Concepts	
	9.2 Design and Implementation of Firewalls,	
	9.3 Intrusion Detection Systems (IDS)	
	9.4 Intrusion Prevention Systems (IPS) etc	
Unit 10	Virus Threats	2
	10.1 Network Viruses	
	10.2 Worms	
Unit 11	Data Hiding	1
	11.1 Steganography	
	EXPERIENTIAL LEARNING	1

Modern College of Arts, Science and Commerce (Autonomous) Shivajinagar, Pune - 5

First Year of M.Sc. (Computer Application) (2019 Course)

Course Code:23CsCmaP213

Course Name: Web Programming-II

Teaching Scheme: 4 Lectures/Week Credits: 4

Examination Scheme: CIA: 50 Marks End-Sem: 50 Marks

Desirable Prerequisites:

• Basic knowledge of HTML tags and skill of creating webpages

Course Objectives:

- Learn Core-PHP, Server Side Scripting Language
- Learn PHP-Database handling

Course Outcomes:

On completion of the course, student will be able to-

To Design dynamic and interactive Webpages

Course Contents:

Unit No.	Title	Number of
		Lectures
Unit 1	Introduction to Web Technologies	6
	1.1 HTTP basics, Introduction to Web	
	server and Web browser	
	1.2 Introduction to PHP	
	1.3 What does PHP do?	
	1.4 Lexical structure	
	1.5 Language basics	
Unit 2	Function and String	4
	2.1 Defining and calling a function	
	2.2 Default parameters	
	2.3 Variable parameters, Missing parameters	
	2.4 Variable function, Anonymous function	
	2.5 Types of strings in PHP	
	2.6 Printing functions	
	2.7 Encoding and escaping	
	2.8 Comparing strings	
	2.9 Manipulating and searching strings	
	2.10 Regular expressions buttons,	
	Listbox, radio, checkbox etc	_
Unit 3	Arrays	8
	3.1 Indexed Vs Associative arrays	
	3.2 Identifying elements of an array	
	3.3 Storing data in arrays	
	3.4 Multidimensional arrays, Extracting	
	multiple values	
	3.5 Conversion between arrays and variables	
	3.6 Traversing arrays	
	3.7 Sorting	
	3.8 Action on entire arrays	
	3.9 Using arrays	
Unit 4	Databases(PHP-PostgreSQL)	8

	4.1 Using PHP to access a database	
	4.2 Relational databases and SQL	
	4.3 PEARDB basics	
	4.4 Advanced data base techniques	
Unit 5	Handling email with PHP	8
	5.1 Email background	
	5.1 Email background5.2 Internet mail protocol	
	S	
	5.2 Internet mail protocol	

	5.6 Email id validation and verification	
	5.7 PHP error handling	
Unit 6	PHP framework	5
	6.1 Introduction to PHP framework.	
	6.2 Features, Applications.	
	6.3 Introduction to Laravel	
Unit 7	AJAX	8
	7.1 Introduction of AJAX	
	7.2 AJAX web application model	
	7.3 AJAX–PHP framework	
	7.4 Performing AJAX validation	
	7.5 Handling XML data using php and AJAX	
	7.6 Connecting database using php and AJAX	
Unit 8	EXPERIENTIALLEARNING	1

Modern College of Arts, Science and Commerce (Autonomous) Shivajinagar, Pune - 5

First Year of M.Sc. (Computer Application) (2019 Course)

Course Code:23CsCmaP214

Course Name: Lab on Advanced Operating

System and Web Programming(PHP)-II

Teaching Scheme: Practical: 2+2 = 4Hours/Week Credit: 02

Examination Scheme: CIA: 25 Marks End-Sem: 25 Marks

Practic	Practical Assignment on PHP		
Sub: W	Sub: Web Programming: II		
Sr.No.	Topic of Assignment		
1.	String manipulation		
2.	Arrays		
3.	Function		
4.	Using object oriented concept		
5.	File Handling		
6.	Form designing		
7.	Error handling in PHP		
8.	Database Connectivity in PHP		
9.	Sessions and cookies		
10.	Simple AJAX		
11.	AJAX validation		
12.	Handling XML data using PHP and AJAX		

Practica	al Assignments on Advanced Operating system
Sub: Ac	lvanced Operating system
Sr. No.	Topic of Assignment
1.	Introduction to Linux (Using basic commands like cat with options, ls with options, cal,
	pwd, wc, grep with options, i/o redirection using >,>>,<, etc)
2.	Creating a directory structure in Linux (Using commands mkdir,cd, rmdir, cp,mv etc.)
3.	An interactive program that accepts month name and checks with current date if the
	person is late
4.	A command line program that accepts only two arguments and outputs sum and product
	of the two
5.	Write a shell script to accept a file name, check if it is regular & show it's contents. (use
	cat command)
6.	Write a shell script to display "Good Morning", "Good afternoon", and "Good
	evening" depending on the hour (use date command)
7.	Write a shell script to accept argument string, and display present working directory if
	argument string is "current", display parent directory if argument string is "parent" and
	display the contents of root directory if argument string is "root" (use pwd, cd and ls
	command)
8.	Write a shell script which checks if any of the strings in the output of date command are
	present in the dirfile
9.	Write a shell script to print the information as to how many files and how many
	directories are present in current directory.
10.	Write a shell script that accepts name from the user and creates a directory by that name,
	then creates a text file in that directory and stores in it, the data accepted from user(till
	^z), and displays the number of characters stored in the file. The program stops if
	directory name given is null
11.	Write a program to implement CPU scheduling algorithm
12.	Write a program to implement memory management algorithm
13.	Write a program to implement Banker's algorithm

Modern College of Arts, Science and Commerce (Autonomous) Shivajinagar, Pune - 5

First Year of M.Sc. (Computer Application) (2019 Course)

Course Code: 19CsCmaP221

Course Name: Soft Computing

Teaching Scheme: TH:4 Hours/Week Credits: 4

Examination Scheme: CIA: 50 Marks End-Sem: 50 Marks

Prerequisites:

- Proficiency with algorithms
- · Critical thinking and problem solving skills
- Knowledge of Probability and Classical logic

Objectives:

- To understand the concepts of how an Intelligent System works and its development process
- To introduce the ideas of Soft Computational techniques based on human thinking
- To generate an ability to design, analyze and perform experiments on real life problems using various Algorithms
- To apply the process of Approximate Reasoning in Modeling

Course outcome:

This course exposes Learners to Neural Network, Fuzzy Logic and Genetic Algorithms which are the major building blocks of Intelligent Systems. Students will be able to develop Soft Computing based Systems.

Unit No.	Title	Number of Lectures
Unit 1	Origins and issues	3
	1.1 Modern neuroscience	
	1.2 Artificial Intelligence	
	1.3 Classical AI and Neural Network	
	1.4 Hybrid Intelligent Systems	
	1.5 The human brain	
	1.6 Biological neurons	
Unit 2	Artificial neurons, neural network and architecture	5
	2.1 Neuron abstraction	
	2.2 Neuron signal functions	
	2.3 Architectures: feed forward and feedback	
	2.4 Salient properties and application domains of neural	
	networks	
Unit 3	Geometry of binary threshold neurons and their	5
	networks	
	3.1 Pattern recognition and data classification	
	3.2 Convex sets, convex hulls and linear separability	
	3.3 Space of Boolean functions	
	3.4 Pattern Dichotomizers	
	3.5 Capacity of a simple threshold logic neuron	
	3.6 XOR problem	
	3.7 Multiplayer networks	
Unit 4	Perceptrons and LMS	5

	4.1 Learning and manager	
	4.1 Learning and memory	
	4.2 From synopses to behaviour : The case of Aplysia4.3 Learning algorithms	
	4.4 Error correction and gradient descent rules	
	4.5 The learning objectives for TLNs	
	4.6 Pattern space and weight space	
	4.7 Perceptron learning algorithm	
	4.8 MSE Error Surface and its Geometry	
Unit 5	Backpropagation	5
	5.1 Multilayered Network Architecture	
	5.2 Backpropagation Learning Algorithm	
	5.3 Practical Considerations in implementing BP	
	algorithm	
	5.4 Applications of Feedforward Neural Networks	
Unit 6	Foundations of Fuzzy Systems	
Cint 0		5
		o de la companya de
	6.1 From Crisp to Fuzzy Sets	
	6.2 Representing Fuzzy Elements	
	6.3 Basic Terms and Operations	
	6.4 Properties of Fuzzy sets	
	6.5 Fuzzy Measures	
	6.6 Fuzzification	
	6.7 The Extension Principle	
	6.8 Alpha-cuts and the Resolution Principle	
Unit 7	Fuzzy Relations	4
	7.1 Composition of Fuzzy Relations	
	7.1 Composition of Fuzzy Relations	

	8.1 Fuzzy linguistic descriptions 8.2 Fuzzy Relation Inferences	
	8.3 Fuzzy Implication and Fuzzy Algorithms	
Unit 9	Defuzzification Methods	3
	9.1 Centre of Area Defuzzification	
	9.2 Centre of Sums Defuzzification	
	9.3 Mean of Maxima (MOM) Defuzzification	
Unit 10	Introduction to Genetic Algorithms	4
	10.1 Robustness of traditional Optimization and	
	search methods	
	10.2 How are genetic algorithms different from	
	Traditional methods	
	10.3 Genetic Algorithm(GA) – A Simulation by hand	
	10.4 Similarity Templates	
Unit 11	Computer Implementation of a Genetic Algorithm	5
	11.1 Data Structures	
	11.2 Reproduction, Crossover and Mutation	
	11.3 A Time to Cross	
	11.4 Mapping Objective Functions to Fitness Form	
	11.5 Fitness Scaling	
	11.6 Coding	
	11.7 Constraints

Modern College of Arts, Science and Commerce (Autonomous) Shivajinagar, Pune - 5

First Year of M.Sc. (Computer Application) (2019 Course)

Course Code: 19CsCmaP222

Course Name: Cloud and Grid Computing

Teaching Scheme: TH: 4Hours/Week Credit: 04

Examination Scheme: CIA: 50 Marks End-Sem: 50 Marks

Prerequisites:

• Knowledge of Programming and Networking

Course Objectives:

- Understand how Grid Computing helps in solving large scale scientific problems
- Gain knowledge on the concept of virtualization that is fundamental to Cloud Computing
- Learn how to program the grid and the cloud
- Understand the security issues in the Grid and the Cloud environment

Course Outcomes:

At the end of the course, the student should be able to:

- Apply Grid Computing techniques to solve large scale scientific problems
- Apply the concept of virtualization
- Use the Grid and Cloud tool kits
- Apply the security models in the Grid and Cloud Environment

Unit No.	Title	Number of Lectures
Unit 1	Introduction	10
	 Scalable computing over the Internet Technologies for network based systems Clusters of cooperative computers Grid computing Infrastructures Cloud computing Evolution of Distributed computing Scalable computing over the Internet Technologies for network based systems Clusters of cooperative computers Grid computing Infrastructures Introduction to Grid Architecture and standards Elements of Grid Overview of Grid Architecture 	
Unit 2	Grid services	8
	 2.1 Introduction to Open Grid Services Architecture (OGSA) 2.2 Functionality Requirements Practical and Detailed view of OGSA/OGSI 2.3 Data intensive grid service models 2.4 OGSA services 	
Unit 3	Virtualization	10

	 3.1 Cloud deployment models: public, private, hybrid, community 3.2Categories of cloud computing: Everything as a service: Infrastructure, platform, software – Pros and Cons of cloud computing 3.3 Implementation levels of virtualization – virtualization structure – virtualization of CPU, Memory and I/O devices – virtual clusters 3.4 Resource Management – Virtualization for data center Automation 	
Unit 4	Programming Model	10
	 4.1 Open source grid middleware packages – Globus Toolkit (GT4) Architecture, Configuration – Usage of Globus – Main components and Programming model 4.2 Introduction to Hadoop Framework – Mapreduce, Input splitting, map and reduce functions, specifying input and output parameters, configuring and running a job – Design of Hadoop file system 4.3 HDFS concepts, command line and java interface, dataflow of File read & File write 	
Unit 5	Security	10
	 5.1 Trust models for Grid security environment – Authentication and Authorization methods 5.2 Grid security infrastructure – Cloud Infrastructure security: network, host and application level – aspects of data security, provider data and its security, Identity and access management architecture 5.3 IAM practices in the cloud 5.4 SaaS, PaaS, IaaS availability in the cloud 5.5 Key privacy issues in the cloud 	

- 1. Cloud Computing Bible, Barrie Sosinsky, Willey India Edition, ISBN: 9788126529803
- 2. Cloud Computing Principles and Paradigms, Rajkumar Buya, James Broberg, Andrzej, Wiley, 2011, ISBN: 0470887990
- 3. Grid Computing, Joshy Joseph, Craig Fellenstein, Person Education, Person Education, ISBN: 978-81-317-0885-9

Course Name: On Job Training-Project

Course code: 23CsCmaP204

Teaching Scheme: Practical:120Hours Credit: 04

Examination Scheme: CIA:50 Marks End-Sem: 50 Marks

To be given by College Authorities

Objectives

• To provide students with practical, hands-on-experience in applying theoretical

- knowledge to real-world tasks
- To help students develop and enhance their skills, problem solving abilities and work
- culture of the industry
- To foster effective teamwork and collaboration skills
- To encourage students to build and expand their professional network by interactive
- with experienced experts and mentors in industry

Course Outcomes

On Completion of this course, student will be able to -

- CO1: Enhance the knowledge related to various tools and technologies used in industry
- CO2: Improve the ability to solve complex problems independently and creatively
- CO3: Effectively utilize critical thinking and analytical skills in tackling real world challenges
- CO4: Effectively communicate and collaborate skills through interaction with team members and mentors.
- CO5: Get an experience in working on projects or related working within industry
- CO6: Develop the ability to document process, design, implementation and testing
- CO7: Familiar with specific industry domain relevant to internship
- CO8: Complete projects and tasks as per the predetermined objectives

Sr.No.	Guidelines for On Job Training (OJT)
1	Student must start the OJT/Internship immediately after semester-II examination
	during the summer vacation
2	Student are expected to complete the IT related work/project within 120 hours
	assigned by organization (company/ industry/ consultancy/ institution)
3	The internship work may involve the IT related assignment(s) OR the maintenance
	ofexisting project OR the design/development of new project OR equivalent work
4	College should assign the mentors/guides for students to monitor the progress
	throughout the OJT
5	Students have to submit the weekly progress report duly signed by the concern
	authorities of organization to the assigned mentor
6	At the end of OJT, students should prepare the documentation and submit a report
	tothe college in prescribed format
7	After completion, the final presentation and documentation will be evaluated by the
	examination panel as per the University norms

Semester –III (Second Year)

Modern College of Arts, Science and Commerce (Autonomous) Shivajinagar, Pune - 5

First Year of M.Sc. (Computer Application)

Course Code: 23CsCmaP311

Course Name: Mobile Technologies

Teaching Scheme: TH: 6 Hours/Week Credit: 04

Examination Scheme: CIA: 50 Marks End-Sem: 25 Marks(T+P)

Prerequisites:

• Student must be aware of Wired and Wireless Networks

- Student must be aware of TCP/IP protocol suit
- Java Programming Knowledge is essential

Course Objectives

• To make the students well aware of software development framework and network architecture for Mobile Computing in order to fulfill the requirements of skill sets expected by IT Industry.

Course Outcome:

- To study Mobile Computing and Mobile Technology.
- To learn the changes/modifications required in Standard Protocols like Mobile IP and Mobile TCP for Mobile Wireless Network.
- To learn new protocols that will be implemented in MANET.
- To learn Software Architecture and changes in Application Environment for the Mobile Computing.
- To get introduced to various platforms and Android Programming Environment.

Course Contents

Unit No	Торіс	Number of lectures
Unit 1	Introduction to Mobile Computing	2 lectures
	1.1 Mobility and Portability	
	1.2 Location Dependent Services	
	1.3 Simplified Reference Model	
	1.4 Cellular Systems	
	·	
Unit 2	Telecommunication Systems	5 lectures
	2.1 GSM (System Architecture, Localization and	

	Calling, Handover, Security)	
	2.2 GPRS Architecture	
	2.3 DECT – System Architecture	
	2.4 UMTS – System Architecture, Handover	
	2.5 UTRAN - System Architecture	
Unit 3	Mobile Network Layer	12 lectures
	3.1 Mobile IP (Goals, Entities and	
	Terminologies, Packet Delivery, Agent	
	Discovery, Registration, Tunneling &	
	Encapsulation, Optimizations, IPV6, Micro-	
	mobility Support)	
	3.2 Dynamic Host Configuration Protocol	
	3.3 Mobile Ad-hoc Networks (Routing,	
	Destination Sequence Distance Vector,	
	Dynamic Source Routing, Alternate Metrics)	
Unit 4	Mobile Transport Layer	4 lectures
CHIL 4	4.1 Tradition TCP Issues	1 100041 05
	4.2 TCP Improvements (Indirect TCP, Snooping	
	TCP, Mobile TCP, Fast Retransmit/Fast	
	Recovery, Transmission/Time-out Freezing,	
	Selective Retransmission, Transaction –	
	· · · · · · · · · · · · · · · · · · ·	
	Oriented TCP)	
	4.3 TCP over 2.5G/3G/4G

Lab Assignments on Mobile Technologies (Android)

Sr. No.	Title
1	Setup Java Development Kit
2	Configure Android SDK
3	Setup Eclipse IDE
4	Setup Android Development Tools Plugin
5	Create Android Virtual Device
6	Problem Definition and Scope
7	Database Design or File Structure Design
8	UML Diagrams
9	GUI Development
10	Testing Android Application
11	Deploying Android Application on Device
12	Testing and Bug Fixing

Modern College of Arts, Science and Commerce (Autonomous) Shivajinagar, Pune - 5

First Year of M.Sc. (Computer Application) (2019 Course)

Course Code: 23CsCmaP312

Course Name: Data Mining and Data Warehousing

Teaching Scheme: TH: 4 Hours/Week Credit: 04

Examination Scheme: CIA: 50 Marks End-Sem: 50 Marks

Prerequisites:

• Basic programming skills

• Basic skills in statistics and linear algebra

Course Objectives:

- This course will introduce the concepts, techniques, design and applications of data warehousing and data mining.
- Some systems for data warehousing and/or data mining will also be introduced.
- The course is expected to enable students to understand and implement classical algorithms in data mining and data warehousing

Course outcome:

On completion of the course students will get knowledge of:

- Data preprocessing and data quality.
- Modeling and design of data warehouses.
- Algorithms for data mining.

Course Contents

Unit 1	Introduction to Data Mining		5 lectures
	1.1.	Basic Data Mining Tasks	
	1.2.	DM versus Knowledge Discovery in	
		Databases	
	1.3.	Data Mining Issues	
	1.4.	Data Mining Metrics	
	1.5.	Social Implications of Data Mining	
	1.6.	Overview of Applications of Data Mining	
Unit 2	Introdu	iction to Data Warehousing	5 lectures

	T	T
	2.1. Architecture of Data Warehouse	
	2.2. OLAP and Data Cubes	
	2.3. Dimensional Data Modeling-Star,	
	Snowflake Schemas	
	2.4. Data Processing	
	2.4.1. Need	
	2.4.2. Data Cleaning	
	2.4.3. Data Integration	
	2.4.4. Transformation	
	2.4.5. Data Reduction	
	2.5. Machine Learning	
	2.6. Pattern Matching	
Unit 3	Data Mining Techniques	6 lectures
	3.1. Frequent Item-Sets	
	3.2. Association Rule Mining	
	3.3. Rule Basic Measures – Support	
	and Confidence	
	3.4. Apriori Algorithm	
	3.5. Use of Sampling for Frequent Item	
	Set 3.6. FP tree algorithm	
	3.7. Graph Mining 3.8. Tree mining	
	3.9. Sequence Mining	
Unit 4	Classification & Prediction	17 lectures
CIII 4	4.1. Decision Tree	17 lectures
	4.2. Construction, Performance, Attribute Selection	
	4.3. Issues: Over-Fitting, Tree Pruning Methods,	
	Missing Values	
	4.4. Continuous Classes	
	4.5. Classification and Regression Trees (CART)	
	4.6. Bayesian Classification	
	4.7. Bayes Theorem, Naïve Bayes classifier	
	4.8. Bayesian Networks	
	4.9. Linear Classifier & Types of Linear Classifiers	
	4.10 Least Squares	
	4.11 Prediction	
	4.12 Linear Regression	
	4.13 Non-linear Regression	
Unit 5	Accuracy Measures	4 lectures
	5.1. Precision, Recall, F-measure, Confusion Matrix	
	5.2. Cross-validation, Bootstrap	
	,	
Unit 6	Data Mining Tools	3 lectures
	6.1. Usage of DM Tools	
	6.2. Sample applications of Data Mining	
Unit 7	Clustering	4 lectures
	7.1. Distance Based Clustering	
	7.2. K-Means Clustering	
	1	1

	7.3.	Expectation Maximization (EM) Algorithm	
	7.4.	Hierarchical Clustering	
	7.4	1. Agglomerative Clustering	
	7.4	.2 Divisive Clustering	
	7.5.	Computing Inter-Cluster Distance	
Unit 8	Overvie	ew of Advanced Techniques	3 lectures
	8.1.	Active Learning	
	8.2.	Reinforcement Learning	
	8.3.	Text Mining	
	8.4.	Graphical Models	
	8.5.	Web Mining	
	8.6.	Spatial Mining	
Unit 9	Experie	ntial Learning	1 lecture
	9.1.	Usage of DM Tool

Modern College of Arts, Science and Commerce (Autonomous) Shivajinagar, Pune - 5

First Year of M.Sc. (Computer Application) (2019 Course)

Course Code: 23CsCmaP313

Course Name: Block Chain Technology

Teaching Scheme: TH: 4 Hours/Week Credit: 04

Examination Scheme: CIA: 50 Marks End-Sem: 50 Marks

Prerequisites:

- Expertise in programming,
- basic knowledge of computer security,
- cryptography, networking, concurrent or parallel programming

Course Objectives:

- To understand the concepts of block chain technology
- To understand the consensus and hyper ledger fabric in block chain technology
- Explore major components of blockchain.
- Learn about Bitcoin, Cryptocurrency and Ethereum

Course Outcomes:

On completion of the course, student will be able to-

- 1. Learn the fundamentals of Blockchain Technology
- 2. Learn Blockchain programming
- 3. Basic knowledge of Smart Contracts and how they function

Course Contents

Unit 1	Introduction to Blockchain	4 lectures
	1.1. What is Block chain,	
	1.2. Block chain Technology Mechanisms & Networks,	
	1.3. Block chain Origins,	
	1.4. Objective of Block chain,	
	1.5. Block chain Challenges,	
	1.6. Transactions And Blocks	
Unit 2	Block chain Basics	4 lectures
	2.1. Types of Network	
	2.2. Layered Architecture of Blockchain Ecosystem	
	2.3. Components of blockchain	
	2.4. Cryptography (private and public keys, Hashing &	
	Digital Signature)	
	2.5. Consensus Mechanisms	
Unit 3	How Blockchain Works?	6 lectures
	3.1. Understanding SHA256 Hash	
	3.2. Immutable Ledger	
	3.3. Distributed P2P Network	
	3.4. How Mining Works? (The NONCE and Cryptographic	
	Puzzle)	
	3.5. Byzantine Fault Tolerance	
	3.6. Consensus Protocols: Proof of Work, Proof of State,	
	Défense Against Attackers, Competing Chains	
Unit 4	Cryptocurrency Intuition	10 lectures

	4.1. What is Bitcoin?	
	4.2. Layers of Cryptocurrency	
	4.3. Bitcoin's Monetary Policy	
	4.4. Blockchain Frequency	
	4.5. Understanding Mining Difficulty	
	4.6. Mining Pools	
	4.7. Nonce Range	
	4.8. How miners pick transactions	
	4.9. Where do transaction fees come from?	
	4.10. How Wallet Work?	
	4.11. Cryptocurrency Demo	
Unit 5	Smart Contracts	4 lectures
0 1200 0	5.1. Ethereum Network	
	5.2. What is a Smart Contract?	
	5.3. Ethereum Virtual Machine, Ether, Gas	
	5.4. Initial Coin Offerings	
Unit 6	Block chain Applications	2 lectures
Cint 0	6.1. Block chain for Government	2 lectures
	6.2. Digital identity	
	6.3. Land records and other kinds of record keeping between	
	government entities,	
	6.4. Public distribution system / social welfare systems:	
	6.5. Block chain Cryptography: Privacy and Security on Block	
	chain.	
Unit 7	Experiential Learning	2 Lectures
	Demo on Blockchain, Smart Contracts	
	,

Modern College of Arts, Science and Commerce (Autonomous) Shivajinagar, Pune - 5

First Year of M.Sc. (Computer Application)

Course Code: 23CsCmaP314

Course Name: Lab on Programming Language (Python)

Teaching Scheme: TH: 4 Hours/Week Credit: 02

Examination Scheme: CIA: 50 Marks End-Sem: 50 Marks

Prerequisites:

• An understanding of programming in an imperative language (e.g., C/C++, Java)

- Knowledge of basic algorithms and data structures (e.g., sorting, searching, lists, stacks, and trees)
- Knowledge of basic discrete mathematics (e.g., sets, relations, functions, induction, and simple algebraic concepts)

Course Objectives:

- An understanding of programming language paradigm.
- Understanding of Lambda Calculus.
- Learning functional programming language Python.

Course Outcomes:

On completion of the course, student will be able to-

- Students can solve problems by using Python language.
- Students can implement projects by using Python Framework.

Lab assignments of Programming Languages(Python)

	Programming Languages(Python)
Assignment 1	Introduction To Python
	Installation of Python on different OS
	Working with Python as a calculator
Assignment 2	Programs on Flow Control
	Basic to advance programs for understanding of different control flow in
	Python
Assignment 3	Functions
	Writing Programs using functions Use of Modules
	Use of modules Use of packages
	Use of packages
Assignment 4	Python programs for Strigng, List
	Building blocks of python programs
	Understanding string in build methods
	List manipulation using in build methods
Assignment 5	Dictionary Manipulations
	Dictionary manipulation, Programming using string, list and dictionary
	in build functions, some Algorithms learned in DAA are implemented
	by using Python
Assignment 6	Python File Operation
	Reading config files in python
	Writing log files in python
	read functions, read(), readline() and readlines()
	write functions, write() and writelines()
Assignment 7	Python Object Oriented Programming
	Simple OO programs
Assignment 8	Python Regular Expression
	Pattern matching and searching pattern searching using regex in python
Assignment 9	Python Database Interaction
	Demo for SQL/ SQlite connectivity
Assignment 10	Python Libraries
	Numpy
	Pandas
Assignment 11	Python Libraries
	Matplotlib
	Scipy
Assignment 11	Python Framework
	Tutorial on Django

Modern College of Arts, Science and Commerce (Autonomous) Shivajinagar, Pune - 5

First Year of M.Sc. (Computer Application)

Course Code: 23CsCmaP321

Course Name: Data Science

Teaching Scheme: TH: 4 Hours/Week Credit: 04

Examination Scheme: CIA: 50 Marks End-Sem: 50 Marks

Course Contents

Unit	Topic	No. of Lectures
Unit 1	Introduction to Data Science	8 lectures
	1.1 What is Data Science, importance of data science,	
	1.2 Big data and data Science, the current Scenario,	
	1.3 Industry Perspective Types of Data: Structured vs.	
	Unstructured Data,	
	1.4 Quantitative vs. Categorical Data,	
	1.5 Big Data vs. Little Data, Data science process	
l	1.6 Role of Data Scientist	
Unit 2	Statistical Interference and Exploratory Data Analysis	8 lectures
	2.1 Introduction-Population and samples, Data Preparation,	
	2.2 Exploratory Data Analysis-Summarizing Data	
	2.3 Data Distribution, Outlier Treatment, Measuring Symmetry, Continuous Distribution, Kernel Density, Estimation: Sample and	
	Estimated Mean, Variance and Standard Scores, Covariance, and Pearson's and Spearman's Rank Correlation	
Unit 3	Machine Learning Algorithms	8 lectures
	3.1 Machine Learning Algorithms: Linear Regression, K-nearest Neighbors(k-NN), K-mean, Spam Filters, Naive Bayes, and Wrangling: Naive Bayes, Comparing Naive Bayes to k-NN,	
	3.2 Scraping the Web: APIs and Other Tools	
Unit 4	Data Visualization	8 lectures

	4.1 Data visualization: Introduction, Types of data visualization, Data types, Data encodings, Retinal variables, Mapping variables to encodings, Visual encodings	
Unit 5	Recommendation Systems	8 lectures
	 5.1 A Model for Recommendation Systems: The Utility Matrix, The Long Tail, Applications of Recommendation Systems, Populating the Utility Matrix, 5.2 Content-Based Recommendations: Item Profiles, Discovering Features of Documents, Obtaining Item Features From Tags, Representing Item Profiles, User Profiles, Recommending Items to Users Based on Content, Collaborative Filtering: Measuring Similarity, The Duality of Similarity, Clustering Users and Items, Evaluation of Recommendation System 	
Unit 6	Social Network Analysis	7 lectures
	6.1 Social Networks as Graphs, Varieties of Social Networks, Graphs With Several Node Types, Clustering of Social-Network 6.2 Graphs: Distance Measures for Social-Network Graphs, Applying Standard Clustering Methods, Betweenness, The Girvan-Newman Algorithm, Using Betweenness to Find Communities	
Unit 7	Experiential Learning	1 lecture
	Case studies

Modern College of Arts, Science and Commerce (Autonomous) Shivajinagar, Pune - 5

First Year of M.Sc. (Computer Application) (2019 Course)

Course Code: 23CsCmaP322

Course Name: User Experience and Design

Teaching Scheme: TH: 4 Hours/Week Credit: 04

Examination Scheme: CIA: 50 Marks End-Sem: 50 Marks

Prerequisites:

• Knowledge of HTML, CSS, JS, HTTP

• Basic concepts of web applications and technology like Cookies, Sessions, HTTP Protocols, Caching, Redirects

Course Contents

Unit 1	Overview of User experience and Design principles	3 Lectures
	1.1 Course Overview	
	1.2 Design Fundamentals, User Flows and Navigation	
	1.2.1 Identify the project parameters	
	1.2.1.1 User personas, storyboards	
	1.2.2 Introduction to wireframing and mockups	
	1.2.2.1 Wireframes, paper prototyping, rapid prototyping	
	1.2.2.2 Wireframes vs Prototypes	
	1.2.2.3 Workflow for designing a site	
	1.3 UXD Principles	
	1.3.1 Visual design, Focal point, Flow and Interaction,	
	Responsive design, The effects of good UXD design	
	1.4 Designing for multi-device environments	

	1.4.1 Introduction to responsive web design	
	1.5 Introduction to CSS	
Unit 2	Introduction to Developer Tools	1 Lecture
	2.1 Using console to debug javascript, angular, react codes.	
	2.2 Using console to debug javascript, angular, react codes.	
	2.3 Testing Request and Response Objects	
Unit 3	Optimization Techniques	3 Lectures
	3.1 Caching	
	3.2 Minification and Deferring of CSS, JS, HTML	
	3.3 Eliminating unused code and render blocking scripts	
	3.4 Image optimization (Types JPG, PNG, SVG	
	https://tinypng.com/)	
Unit 4	Responsive Web Design	3 Lectures
	4.1 View port	
	4.1.1 What is viewport?	
	4.1.2 Setting up viewport.	
	4.2 Introduction to Media queries	
	4.2.1 Min and Max parameters, examples.	
	4.2.2 Screen resolutions and orientations	
	4.3 Introduction to Bootstrap	
	4.3.1 Bootstrap Basics, Grids, Themes	
	4.3.2 Bootstrap CSS & JS	
Unit 5	Introduction to Typescript	3 Lectures
	5.1 Comparison between Javascript and Typescript	
	5.2 Data types and variables	
	5.2.1 Basic data types, arrays, enums, tuples	
	5.2.2 Difference between let and var	
	5.2.3 Const declaration	
	5.2.4 Type casting	
	5.2.5 Arrow function	
	5.3 Working with classes	
	5.3.1 Writing and using classes	
	5.3.2 Constructor method	

	5.3.3 Inheritance	
	5.4 Working with Interfaces	
	5.4.1 Interface Declaration and Initialization with an object,	
	DuckTyping, Interface Implementation by class,	
	Extending Interfaces	
	5.5 Modules and Namespaces	
	5.5.1Export Syntax, Import Syntax, Re-export, Default exports,	
	Using require(), Declaring and Using Namespaces	
	5.6 Introduction to Block element modifier	
Unit 6	Introduction to Front End Frameworks	2 Lectures
	6.1 Feature comparison between Angular Js, React Js, VueJs, Create Js,	
	Express, Node Js	
Unit 7	Node Js	3 Lectures
	7.1 Introduction to Node Js	
	7.2 Node Js Modules and File System	
	7.3 Use npm and manage node packages	
	7.4 Node Js and Database connectivity	
	7.4.1 MySQL and MongoDB connectivity.	
	7.5 Node Js and Express Js example	
Unit 8	AngularJS	12 Lectures
	8.1 Introduction to Single Page Application	
	8.2 Introduction to AngularJS MVC Architecture	
	8.2.1 AngularJS Expressions - Number and String Expressions,	
	Object Binding and Expressions	
	8.2.2 AngularJS Modules - Module Loading and Dependencies	
	8.2.3 AngularJS Data Binding	
	8.2.4 AngularJS Directives & Events - Core directives, conditional	
	directives.	
	8.2.5 AngularJS Scope and Controllers - Programming Controllers and	
	\$scope object, Nested & Multiple Controllers and Scope Inheritance,	
	Adding Behavior to a Scope Object	
	8.2.6 AngularJS Filters - Purpose of filters, Built-in and Custom	
	filters	

	8.2.7 AngularJS Services - Developing services	
	8.2.8 AngularJS HTTP	
	8.2.9 AngularJS Tables	
	-	
	8.2.10 AngularJS Select - Working with Select and Options	
	8.2.11 Fetching Data from MySQL	
T1 '4 0	8.2.12 AngularJS Validation	21
Unit 9	Unit Testing	2 Lectures
	9.1 Why we do unit testing	
	9.2 Introduction to Jasmine, Karma, using the ngMock Module	
	9.3 Cross Browser, Cross Device testing (Developer perspective)	
Unit 10	React and Redux	10 Lectures
	10.1 Introduction to React and Redox	
	10.2 Introduction to ReactJS	
	10.2.1 History of front end libraries	
	10.2.2 Key differentiators (Virtual DOM, One way binding)	
	10.2.3 Thinking in React, React Components	
	10.2.4 React component	
	10.2.5 Render function	
	10.2.6 Component API	
	10.2.7 Component lifecycle	
	10.2.8 State	
	10.2.9 Props	
	10.2.10 Mixins	
	10.2.11 JSX ,React internals	
	10.2.12 Reconciliation algorithm	
	10.3 Component inter communication	
	10.3.1 Component composition	
	10.3.2 Pass data from parent to child & vice-versa	
	10.4 Component styling	
	10.4.1 Radium	
	10.4.2 CSS Modules LESS/SASS	
	10.5 Unit testing components - Enzyme, Jest, React test utilities	
Unit 11	Introduction to Redux (5 Lectures)	4 Lectures
	,	

	11.1 Flux Architecture and redux	
	11.2 Redux action, combining reducers, and Reduxthunk	
	11.3 client-server communication using Fetch and the REST API.	
	11.4 Testing, building and deploying React applications.	
Unit 12	Experiential Learning	2 Lectures
	1 8	
	Study the overall success of any Website or Application using User

Semester –IV (Second Year)

Modern College of Arts, Science and Commerce (Autonomous) Shivajinagar, Pune - 5

First Year of M.Sc. (Computer Application) (2019 Course)

Course Code: 23CsCmaP411

Course Name: Industrial Training / Institutional Project

Teaching Scheme: Full Time Training in Industry/Institution

Teaching Scheme: TH: 2 Hours/Week Credits: 16

Examination Scheme: CIA: 200 Marks End-Sem: 200 Marks

Guidelines for Continuous Internal Assessment (CIA) of Industrial Training / Institutional Project (ITP/IP) of 150 Marks :

- 1) Students will participate in the Placement activity conducted by the Department.
- 2) Upon selection in IT company, the student will submit the photocopy of the Offer letter/ Appointment letter, Joining letter and Identity card.
- 3) The student will have to submit a Synopsis of the Project work to the department within a period on month from the date of joining.
- 4) Internal Project Guide will be allotted to each student.
- 5) Students should interact to internal project guide by means of personal counseling through Whatsapp, E-mail and so on once in a week to discuss about the Project Progress.
- These presentations / project discussions, communication and interaction will be considered towards CIA.
- 7) After the completion of the ITP/IP, a student will have to submit the final Project documentation along with the Project completion certificate from the respective Industry/Research Institute /Educational Institute.
- 8) Project documentation also needs to be submitted in the form of soft copy.
- 9) A student can complete ITP/IP with a research project of a Faculty / an Expert funded by Savitribai Phule Pune University, Pune / Modern College of Arts, Science and Commerce(Autonomous), Pune-5/ any Funding Agency.

10) Evaluation for Internal 150 Marks(CIA) will be done by respective internal guide according to the student's performance and details in the Project Progress Report as follows:

Project Discussion (Per Week)	Project Progress (Per Week)	First Presentation / Project Demonstration	Second Presentation & Project Demonstration	Documentation
20	10	40	40	40

Guidelines for End Semester Final Assessment(ES) of Industrial Training Project(ITP) / Institutional Project(IP) of 150 Marks:

- 1) Student will make a presentation of Project work which should include all the details (permitted by Company) of work done by the student during training period.
- 2) Evaluation for external 150 Marks(ES) will be done by Industrial Expert, Academic Expert and one Internal Examiner depending on Presentation, Documentation, Project Contents, Project Demonstration, Testing etc.
- 3) The project performance will be graded by the Examiners (One Internal Examiner, one External Examiner(Academic expert) and one Industrial Expert) as follows:

Total marks out of 300:150 marks CIA + 150 marks ES

Grades will be assigned as below:

Sr. No.	% of Max. Marks	Grade Point	Grade Letter
1	91<= Marks <= 100	10	O (Outstanding)
2	75 <= Marks <= 90	9	A+ (Excellent)
3	60 <= Marks <= 74	8	A (Very Good)
4	55 <= Marks <= 59	7	B+ (Good)
5	50 <= Marks <= 54	6	B (Above Average)
6	45 <= Marks <= 49	5	C (Average)
7	40 <= Marks <= 44	4	D (Pass)
8	Marks < 40	0	F (Fail)
9	Nil	0	Ab (absent)
